teamitt™

Business Intelligence Tool

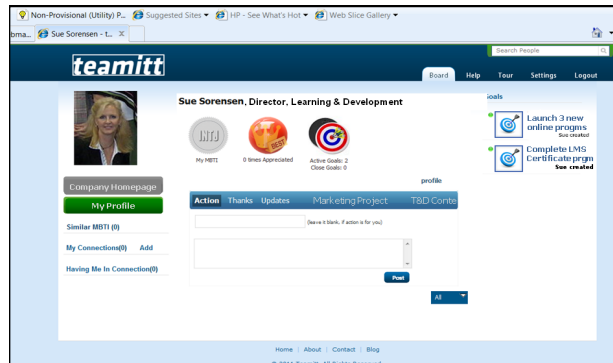

- Cloud technology
- Forward-looking platform
- Intelligent -intuitive

Viral Collaboration Tool

- All-access, inclusive
- Top down *and* bottom up
- Transparent / all visible

Welcome to the next exciting chapter in organizational social networking. Teamitt™ is a simple, dynamic — and private — organizational network connecting teams, employees and managers within your organization. Employees participate in developing their personal and team pages, and your company's current developmental and talent management tools are integrated.

Teamitt™ is easy to implement. Its cloud-based format means there is no software to install. Your team can begin using the program instantly. Functionality can be expanded with simple add-ons and integration tools.

teamitt™

Real connections; solving real problems.

- Promotes dynamic employee development and organizational insight through profile information sharing.
- Teams can easily communicate and distribute information
- Managers can provide real-time feedback and communication
- Promotes social learning, synchronous & just-in-time training and development
- Program is intuitive and utilizes algorithms that intelligently support and interact with the employee company leadership

Dynamic Employee Profile Information:
for employee development & organizational planning.

Top to Bottom Access:
Senior leaders have equal access to employees' world, knowledge and goings on and vice versa.

Collaboration Tool:
online meetings, real-time communication; integrates assessment or process tools (MBTI, DiSC, LEAN, Six Sigma, etc.).

Project Management:
unique project pages; single search point for status, documents & communication.

Performance Management Tool:
real-time feedback, recognition; individual team and enterprise-wide evaluation.

Training & Development:
social learning, organization-wide resource exchange, plus traditional resources and LMS integration.
